

Mission Statement of GWG

Vision

Equal participation in daily life is understood by all people.

We facilitate this through our actions and represent participation.

We support the abilities of all people in GWG and create cooperation in partnership with our economic clients and funding agencies.

Mission

Our internal clients with their wishes, wills and abilities are the focus of our actions.

We accompany them where they need support to live a self-determined life.

Therefore we create adequate services together with our internal clients and offer room for self-awareness.

We offer our internal and economic clients as well as our funding agencies quality, responsibility and innovative solutions considering a careful treatment of nature.

We attend our requirements by continuous education, health offers and a steady development of our business areas.

We participate in social life in a joint way and maintain an active exchange with nature.

Behaving like this we overcome barriers towards an equal participation.

Core values

Our actions are characterised by five core values:

1. We appreciate diversity.
2. We believe in our strengths.
3. We face each other with respect.
4. We interact with each other in an honest and result-based way.
5. We work together to achieve our goals and use our resources in a responsible way.

Consequently, participation is possible.
